New and Rare Plants, Bulbs, Fruits.

OLIVER H. DREW, Hibernia Dutchess County New York.

SPECIAL ISSUE

In preparing this catalogue it has been my aim to make it of interest to you. I trust that I have succeeded and may receive your order. If of no value to you I respectfully ask that you do not destroy it but pass it to your neighbor.

HARVESTING GIANT BEGGAR WEED FOR HAY.

GIANT BEGGAR WEED. (*Desmodium molle*.)

Highly recommended by U. S. Department of Agriculture.

This is a valuable forage plant and a wonderful restorer of the land, far more valuable as a fertilizer than either peas or clover, and superior to either for forage; besides it has the great advantage over both the above in that it does not have to be planted each year, for when once established in the soil it comes up annually without any further attention. It interferes with no crop that you may plant, being easily kept under by cultivation, and it can easily be totally eradicated from the soil by two years' successive pasturing. This feature, too, adds to its great value, for some valuable forage plants become actually the worst of pests (as bad as cocoa), when you wish to devote the land on which they are established to the cultivation of some other crops. This plant is a rank feeder—with deep feeding roots—and brings up from the sub-soil the dormant fertilizing elements deposited there for years, and deposits them on the surface when they shed their foliage in the fall. Land, which six years ago would not yield more than eight bushels of corn per acre, and actually too poor to cultivate, now seeded in this Giant Beggar Weed, readily yields *twenty to twenty-five bushels per acre with never an ounce of fertilizer used on it*. If you want the best fertilizer and the cheapest—seed your lands in Giant Beggar Weed. For forage it has no equal. Hogs, cows, horses and mules fatten on it when nothing else will bring them out, and they will refuse any other food when they can get Beggar Weed. Old worn-out horses and mules, when turned in Beggar Weed pasture, will get sleek and fat without further attention. Farmers will make no mistake in investing in Beggar Weed. About five (5) pounds will thoroughly seed an acre.

Price 10 cents a packet; 3 ozs., 25 cents; lb. 50 cents; 5 lbs. \$2.00, by Mail.

Forage Plants that thrive on Arid Soils.

SAND, WINTER or HAIRY VETCH. (*Vicia villosa*.) This variety thrives on poor, arid, sandy soils. It is sown either in fall or in spring, and generally mixed with rye, which serves as a support to the plants. It grows to a height of from three to four feet, and can be cut twice for fodder, first as soon as the bloom appears, and then it can be again cut for the seed. The plant is perfectly hardy, and the produce is recommended as most nutritious. The seed is black and perfectly round, and should be sown at the rate of one and one-half bushels to the acre. Pkt. 10 cts.; pint 20 cts.; quart 30 cts. all by mail.

GIANT SPURRY. For worn out, clover sick, sandy, gravelly soil, no better crop can be planted than Giant Spurry—it tones up worn out soil and produces an abundance of sweet nutritious pasture and hay. Cows will give more, and better milk and butter when fed on this. Sow on waste places, sandy, gravelly, stony knolls and fields and get same returns from them. Price, oz. 10 cts.; lb. 25 cts.

DOUBLE CUTTING SAINFOIN This is a plant of tried and proven merits. It yields immense crops of hay and furnishes abundance of pasture. On poor thin soils its greatest merits are revealed—thousands of acres of land in England and Germany that would not produce a pittance without this plant, with it make good returns to the farmer—easy grown and easy to cure as hay. Fine for sheep and equally good South and North. Price 5 cts. pkt.; lb. 25 cts. Sow 10 lb. per acre.

LATHYRUS SILVESTRIS WAGNERI This plant has only been before the public for the last few years. It created a great sensation from the start, so thoroughly was it advertised and praised by the different agricultural experiment stations and foreign authorities. It has long fleshy roots like alfalfa—and while a little difficult to get established the first year—it is certainly a great land enriching and fodder plant. I recommend all farmers to try it in a small way at least. It is said to be a wonder. Price, pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 50 cts.; lb. \$1.75.

IDAHO COFFEE PEA, adapted to the Arid Regions. It grows and matures without irrigation, apparently gathering sufficient moisture from the air. Easily cultivated and very prolific.

AUSTRALIAN SALT BUSH. A Forage Plant for Alkali Soil and for Regions subject to Periodic Drought.

This is a most wonderful forage plant as it will grow freely in arid and Alkali lands, that will produce no other vegetation, yielding a marvelously liberal foliage which is eagerly eaten by all kinds of stock. It is of creeping habit. From twenty to thirty tons of green fodder have been harvested from one acre. It has further been proved that after three or four crops have been grown on alkali land, that the soil is then capable of producing any other vegetation. In many sections of the States this is in itself of priceless value.

This plant has been very extensively tried at the California Experimental Station, where single plants, grown on the poorest alkali ground, have reached a diameter of sixteen feet in one season. One pound of seed will plant an acre. It grows readily from seed and requires no cultivation. Price, per lb. \$2.50; $\frac{1}{4}$ lb. 75 cts.; oz. 25 cts.; pkt. 10 cts.

SAND VETCH.

Has been tried in Colorado, Utah and New Mexico and will grow almost anywhere and produce more stock feed to the acre than any other plant.

When browned and ground for coffee it is an excellent substitute.

As good cooked as table Peas and makes delicious soup.

Weevils, Grasshoppers and other insects do not prey upon it and has no known insect enemies. Pkt. 10 cts.; pound 30 cts. by mail.

CRIMSON CLOVER.

(TRIFOLIA INCARNATUM.)

Large package by mail, 10 cents. By Express: bushel, \$3.75; ½-bushel, \$2.00; peck, \$1.75.

"Never in the history of Agriculture has the discovery of an economic plant been more opportune."

1. You can get a heavy crop of hay 3 months after sowing seed.
2. Can be cut two to four times a season.
3. It will grow on clover-sick land.
4. It will grow where you can't raise a spear of red clover.
5. Valuable for soiling and silage.
6. A Fall, Summer and Spring pasturage.
7. In the South it makes a rich winter pasturage.
8. Gathers nitrogen. Will double your crops by ploughing under, and will double the yield on worn-out land.
9. Valuable as a **seed producer**.

The raising of Crimson Clover seed is now a leading and most profitable crop to the Delaware farmer.

Raise your own seed; you do not have to have expensive cleaning machinery for that purpose, it grows just as well or better when sown in the chaff, in fact it is **nature's way**.

Teosinte.

Crimson Clover.

TEOSINTE.

This gigantic Gramina is a wonder of productiveness, of sweetness, and of nutriment. It produces a swamp of corn-like foliage through scorching heat and parching drouths. Cattle eat it ravenously, and people who have planted it, say: as a forage or fodder plant, this is the greatest thing of the age, especially for the South. In appearance it resembles corn, but the leaves are much longer, broader, sweeter. It grows 12 feet high, producing a great number of shoots, which are thickly covered with heavy foliage. 85 stalks have been grown from one seed, and it produces 40 tons to the acre. At the rate which hay and other stock feed costs, Teosinte will yield \$200 worth of fodder or ensilage to the acre.

May be cut two or three times during the season.

The true Algerian seed, grown on the scorching plains of Algiers. Plant like corn—three pounds to the acre. Large packet, 15c.; ounce, 20c.; 2 ounces, 30c.; half-pound, 75c.; pound, \$1.25, by mail. By Express, 10 lbs. or more, \$1.00 per lb.

GIANT BEGGAR WEED (*Desmodium molle*.)

Highly recommended by U. S. Department of Agriculture.

This is a valuable forage plant and a wonderful restorer of the land, far more valuable as a fertilizer than either peas or clover, and superior to either for forage; besides it has the great advantage over both the above in that it does not have to be planted each year, for when once established in the soil it comes up annually without any further attention. It interferes with no crop that you may plant, being easily kept under by cultivation, and it can easily be totally eradicated from the soil by two years' successive pasturing. This feature, too, adds to its great value, for some valuable forage plants become actually the worst of pests (as bad as cocoa), when you wish to devote the land on which they are established to the cultivation of some other crops. This plant is a rank feeder—with deep feeding roots—and brings up from the sub-soil the dormant fertilizing elements deposited there for years, and deposits them on the surface when they shed their foliage in the fall. Land, which six years ago would not yield more than eight bushels of corn per acre, and actually too poor to cultivate, now seeded in this Giant Beggar Weed, readily yields *twenty to twenty-five bushels per acre with never an ounce of fertilizer used on it*. If you want the best fertilizer and the cheapest—seed your lands in Giant Beggar Weed. For forage it has no equal. Hogs, cows, horses and mules fatten on it when nothing else will bring them out, and they will refuse any other food when they can get Beggar Weed. Old worn-out horses and mules, when turned in Beggar Weed pasture, will get sleek and fat without further attention. Farmers will make no mistake in investing in Beggar Weed. About five (5) pounds will thoroughly seed an acre.

Price 10 cts. a packet; 3 ozs., 25 cts.; lb., 50 cts.; 5 lbs., \$2.00, by Mail.

DWARF ESSEX RAPE,

Dwarf Essex. Extensively grown for forage especially for sheep, and for green manure, for which purpose there is, perhaps, no plant better adapted where a quick, rank growth is desired. Farmers who desire to get young cattle, sheep or lambs into favorable condition to be sold advantageously in the fall, can do it most cheaply by growing this Rape; they can be turned into it within 6 to 8 weeks after sowing. Prepare the ground as for turnips and sow in June or July, with a turnip drill, in rows two and one-half feet apart, at the rate of two and one-half pounds seed per acre, or may be sown broadcast at the rate of five pounds per acre; it may also be sown in April for an early crop. Price by Mail, packet, 5 cts.; lb., 20 cts.; 3 lbs., 50 cts.

SACALINE

(*Polygonum Sachalinense*.)

A NEW FORAGE PLANT.

SACALINE.

The Introducer says:

"It is perfectly hardy even in Siberia. Flourishes in the Indies. Requires no plowing before planting. Needs no cultivation, no manuring, no re-planting. Roots penetrate deep into the soil.

ONCE PLANTED, STANDS FOREVER.

Luxuriates in wet lands. Endures severest drought with impunity. Grows in poorest soils.

Thrives where no other forage plant will grow.

Young shoots and leaves eaten as a vegetable. Stems and leaves, green or dry, greatly relished by cattle, sheep and horses.

More nutritious than Clover or Lucerne. Produces 90 to 150 tons of green foliage per acre.

Gives three and four cuttings per year. Planted at any time. Grows 14 feet high by June. Excellent soil enricher."

Large pkt., over 250 seeds, 10c.; 3 pkts., 25c.; 1 oz., 75c.

PLANTS, 10c. EACH: \$1.00 per doz., postpaid.

GRAND LIST OF FORAGE PLANTS.

Special offer of all new kinds by mail.

Over One Dollar's worth of Seed for 75 cents.

Giant Beggar Weed..	10c.	Lathyrus Sylvestris..	10c.
Sacaline.....	10c.	Crimson Clover.....	10c.
Teosinte.....	15c.	Australian Salt Bush..	10c.
Alfalfa.....	10c.	Dwarf Essex Rape...	5c.
Giant Spurry.....	10c.	Sand Vetch (<i>Vicia villosa</i>).....	10c.
Dble Cutting Sainfoin	5c.		

This collection of the ten kinds, one packet each, mailed for 75 cts. and a few sample packets of vegetable seeds added.

See General List for Bulk Prices—Page 13.

MILLA BIFLORA.

Aztec Bridal Flower.

This chaste beauty is a snow-white "Star of Bethlehem," very large, waxy white, with a diamond sparkle, very fragrant. Blooms the entire summer. One of our most beautiful summer-flowering bulbs for cutting. Nothing is better. A chaste flower of exquisite beauty, delicious fragrance and will keep for two weeks when cut, until every flower opens. Treat bulbs same as gladioli.

Bulbs, 2 for 8c.; 5 for 15c.; 12 for 30c.

PRYNIUM VARIEGATUM.

A magnificent ornamental foliage plant for lawn, beds and borders, tubs and vases. Grows easily and rapidly, making a plant 2 feet high, with most beautiful marbled and variegated leaves often 5 inches broad, white, creamy-white and green; elegant as a pot plant. Tubers should be treated like a gladiolus. Keep in a dry, moderately warm place.

15c. each, 3 for 30c.; 6 for 50c.; 80c. doz.

CINNAMON VINE.

This Vine is hardy as a rock, standing the coldest winters; increases in size and luxuriant growth every year; will soon drape windows, doorways and porch with the glossy green, heart-shaped foliage (always free from all insects and pests); thickly studded with charming white flowers having a delicious and refreshing cinnamon fragrance. This plant comes from China, and the roots are a staple article of food with the Chinese.

Bulbs, 2 for 5c.; 5 for 10c.; 12 for 20c.

Roots, 1 and 2 years old, 6c. each; 2 for 10c.; 12 for 50c.

IRIS JAPANESE.

A mixture of magnificent named kinds, many of which sell for 50 cents each, and have flowers 9 inches across. This plant is hardy. Price of plants, 10c. each; 3 for 25c.

Seed Pkt., 30 seeds, 5c.

MADEIRA VINE.

A rapid growing vine, covering a large space in a short time. Fleshy heart-shaped leaves of a light green, and in late summer numerous racemes of feathery flowers of powerful and delicious fragrance. A very beautiful and popular vine for summer screen. Bulbs keep in the cellar without trouble.

4c. each; 2 for 6c.; 6 for 15c.; 12 for 30c.

IRIS JAPANESE.

SUMMER

FLOWER-

ING

OXALIS.

These little bulbs are not much larger than Peas, but quickly throw up a mass of pretty foliage and flowers; fine for beds, borders and edgings; also for pots, baskets and vases. For edging, plant two or three inches apart. Foliage like a shamrock. Lovely pink flowers. 12 for 10c.; 20 for 12c.; 50 for 25c.

Superb Double Hollyhock Plants.

15c. each, \$1.50 per dozen,
\$10 per 100, postpaid.

Superb Double Hollyhock Plants.

These are the grand old monarchs of the "old-fashioned garden." For planting in rows, groups or singly they are charming—such pillars of color, so delicate, intense and pleasing. My mixed colors include pink, salmon, white, yellow, maroon and red. Good culture and a little protection during the winter will insure magnificent results. Strong one-year old blooming clumps, finest mixed colors, 15c. each, \$1.50 per dozen, \$10 per 100.

Mammoth Double Fringed "Allegheny" Hollyhocks.

These are simply indescribable. The flowers resemble crushed china silk, or the most brilliant crepe paper. The colors are a dream. The spikes often grow 7 feet high. Don't be without some of these wonderful flowers.

Strong blooming plants one-year old, 15c. each, \$1.50 per dozen, \$5 per 50.

New Double Flowering Altheas.

(Tree Hollyhocks.) Our most beautiful summer and fall blooming shrub, entirely hardy.

Maid of Orleans (new). Large double snow-white flowers, literally covering the stalk for months. Blooming plants, 15c. each, 2 for 25c., 6 for 50c.

Ball of Fire (new). The finest double red, contrasting finely with the white. Blooming plants, 15c. each, 2 for 25c., 6 for 50c.

One each of the two kinds 25c. by mail.

New Allegheny Hollyhocks.

Mammoth Fringed Flowers, Blooms the First Year from Seed. These new Hollyhocks are the largest and most beautiful of any. Flowers 4 to 6 inches across, fringed and curled with a peculiar texture which looks like crushed silk. Shell pink, rose and ruby-red; flames of colors delicately shaded toward the edge. Every flower opens on the spike. A magnificent and artistic plant. All colors mixed, pkt., 50 seeds, 8c.

Hollyhocks.

World's Fair Mixture. This grand old plant was always dear to us all. But of late years it is a wonder. Enormous flowers with such deep colors, such delicate shades of pink, blush and yellow, with all the darker ones to almost black. Pkt. of 20 colors, 50 seeds, 5c.

Double Black.—Pkt., 50 seeds, 8c.

Gaillardia Grandiflora.

Lobelia Hardy Hybrids.

These new hybrids are extremely showy and handsome, long spikes of most brilliant colors, scarlets, purples, pink and white—bloom the first year from seed. The plants continue to increase

Copyrighted
November 1893
J. H. MOORE & CO.

Hardy Perennial Lobelia Hybrids.

in size and beauty each year. Very desirable. Seed pkt., 150 seeds, 8c. Plants, mixed colors, 15c. each, 10 for \$1.

Gaillardia. ✻ **Grandiflora.** Gaillardias are among the showiest and most effective of hardy perennial plants; beginning to flower in June, they continue one mass of bloom the entire season; they will thrive in almost any position or in any soil, but respond freely to liberal feeding; being perfectly hardy they require absolutely no protection, taking care of themselves. The flowers are large, from 2½ to 3½ inches in diameter; they are produced on long stems, and are excellent for cutting, and of the most gorgeous coloring. The centre is dark red brown, while the petals are variously marked with rings of brilliant scarlet crimson, orange and vermilion, and often a combination of all these colors in one flower. Strong clumps for immediate effect, 15c. each, \$1.50 per dozen, \$10 per 100. Strong young plants, which will flower freely

this summer, 10c. each, \$1 per dozen, \$8 per 100. Seed, 125 seeds, 5c.

Golden Glow.

Rudbeckia.

Golden Glow.

A beautiful, hardy perennial plant, growing eight feet high, branching freely and bearing

by the hundreds, on long, graceful stems, exquisite double blossoms of the brightest golden color, as large as and like Cactus Dahlias.

Strong, blooming plants 10c. each, 3 for 25c., by mail.

Delphinium ✻ **Formosum.**

One of the deepest, richest blues we have in any flower. Flower spikes grow 2 to 3 ft., and many times a dozen on a plant. By cutting the first spikes off short they will bloom again in the fall. Plants soon produce large clumps, and extremely hardy. Blooming plants 15c. each, 2 for 25c.; 10 for \$1.

Flower Spikes, Delphinium Formosum.

Hardy Phlox—Aureore Boreale.

New Early Flowering Hardy Phlox Plants.

I pronounce these to be the most beautiful, the most satisfactory of all hardy plants. Absolutely sure to bloom the first year, and live indefinitely.

Aureore Boreale. Very large, pure pink, crimson center, extra.

Eclairer. Immense flowers, violet purple, large white eye, about the best Phlox grown.

Esperance. A charming lavender pink, large white eye, profuse early bloomer.

Derviche. Violet, Carmine eye, early.

Maid of Orleans. Snow white; a beauty, early.

La Vogue. Soft, rosy pink, lovely shade.

Lord Rayleigh. Bluish tint, early.

Marie Stuart. Blooms in June, white, pink eye.

Miss Lingard. Immense truss, snow white, rosy center.

Richard Wallace. Carmine center, white zone.

Sir Edwin Landseer. Carmine-crimson, very bright, same as Crimson Rambler Rose.

White Queen. Large, immaculate white, beautiful.

Each 15c., 2 for 25c., Any 6 for 65c.

Special Offer. The entire set of 12 for \$1, postpaid. All guaranteed to bloom.

Helianthus Multiflorus Plenus.

(The Hardy Double Golden-Yellow Sunflower.)

A plant that should be in every garden, and one that will give entire satisfaction. The flowers are from 3 to 4 inches in diameter, as double as any Double Dahlia, and cover the plant from the ground to the top. Color, a bright golden yellow. It should have a sunny position and rich soil. 15c. each, 2 for 25c.

Finest hardy perennial Phlox Seed, pkt. 150 seeds, 6c.

The New Giant Ever-Blooming Tritoma.

Tritoma Pfitzerii. A grand improvement on Tritoma Uvaria Grandiflora. The flower spikes, which are produced with considerable more freedom than in the old variety, are of gigantic size, frequently $4\frac{1}{2}$ feet high, with heads of bloom over 12 inches long, of a rich orange-scarlet, shading to salmon-rose on the edge. 20c. each, 3 for 50c.

New Apple—Bismarck.

New Apple—Bismarck.

The most remarkable apple ever introduced; one year grafts frequently produce fruit, and two-year trees seldom fail. A two-year single-stem tree, about 18 inches high, ripened a fine specimen on our grounds. Originated in New Zealand; has been tested in nearly every apple-growing country, and promises to succeed wherever apples can be grown, proving healthy, hardy, productive, and without a rival in its early fruiting quality. Tree of short, stocky growth, thick, healthy foliage; fruit, large, handsome, yellow, shaded red; flesh, tender, pleasant, sub-acid; good for dessert, superior for cooking; will keep well into winter. 25c. each, 5 for \$1; 2-year trees, 40c. each, 3 for \$1, all postpaid.

New Pear—Keiffer.

The most sought-after Pear today. The sales of it exceed that of all others combined. Fruit large to very large; skin yellow, with a bright vermillion cheek; flesh brittle, very juicy, with a marked musky aroma. Tree very vigorous and very prolific. Foliage rich and glossy, making an exceedingly beautiful lawn tree. 40c. ea., \$4 doz., postpaid.

The New "Marvin Crystal" Currant.

Truly giant bunches, borne in great profusion. Should be in every garden. The plant is a very strong grower. It is wonderfully prolific, bearing nearly two to one compared with the well-known Cherry Currant. The berries, which are white and as large as small grapes, contain only one half as many seeds as other varieties of currants. In flavor it is mild and free from the sharp sourness of the red varieties.

Price, 2-year old plants, ea h 25., 3 for 50c.; per 100, \$12, prepaid.

Price, 1-year old plants, each, 10c., 3 for 25c.; per 100, \$6, prepaid.

North Star—Red.

Wonderfully prolific; the stem of fruit thickly set, average four inches in length. Very sweet and rich, a fine dessert fruit and unequaled for jelly. Bears early. 1 year plants, 10c. each, \$1 per dozen, postpaid.

The New Marvin Crystal Currant.

Eleagnus Longipes.

Eleagnus Longipes.

A most beautiful flowering and berry-bearing hardy shrub. The flowers are a bright yellow and very pretty, produced in bewildering profusion. These are followed by the oval, orange-red fruit, half an inch long, prettily dotted with white. The fruit is produced in the greatest abundance. It has a sub-acid, sprightly pleasant flavor when eaten raw, and makes most delicious jams and jellies. A most remarkable plant, being so very ornamental, as well as useful. 15c. each, 2 for 25c.

Three Best Ever-blooming
Roses in the World :: ::

Coronet * Burbank * Kaiserin Augusta Victoria One of each
kind for :: 40c.

KAISERIN AUGUSTA VICTORIA.
BEST WHITE EVER-BLOOMING GARDEN ROSE

color is a deep rose pink, the centre shading to beautiful soft rose. The petals are well incurved, so that the centre is hidden. In September and October the outer petals change to a deep, rich carmine. The whole flower is most pleasing in its rich, graceful beauty, and is delightfully fragrant. 15c. each; 2 for 25c.; 8 for 60c.

Kaiserin Augusta Victoria. Color soft, pearly white; fragrant. The perfectly shaped flowers are borne in profusion on long, graceful stems, rendering it valuable for cut flowers, so free that every shoot is invariably crowned with a magnificent flower; much the finest of its class and succeeds splendidly out-of-doors. 15c. each; 3 for 40c.

A Beautiful New Tea Rose—Maman Cochet. One of the very best and most valuable Roses of recent introduction, especially for outdoor blooming; the finest pink garden Rose yet introduced. The flowers, which are of great size, are very double, extra large and full; color bright rose, with shading of yellow in centre. 10c. each; 3 for 25c.

Grand New Rose —Coronet.*

Sweetest, largest, and freest blooming Hybrid Tea Rose in cultivation. No description or illustration can do justice to the remarkable beauty and splendor of its flowers. From the time the plant is four inches high it blooms steadily, bearing in unbroken continuity, on good and stiff stems, magnificent large flowers that frequently measure from four to six inches in diameter. The form is full, deep, and wonderfully double. In the bud the color is a deep rich carmine, which, as the flowers open, lightens to a soft, clear pink. The fragrance is simply delicious. Probably the most valuable and satisfactory Rose for general cultivation sent out for many years. 15c. each; 2 for 25c.; 12 for \$1.25.

The Burbank Rose.

A perfectly hardy, free-flowering, ever-blooming Rose, raised by Mr. Luther Burbank, known the world over as the "Wizard of Horticulture." The only Rose which he was willing should bear his name. The Burbank is without exception the freest-flowering Rose in cultivation. The flowers are double, of fine form, nearly three inches across. The

Champion of the World. A remarkable sort, which combines the most desirable qualities. It has stood the severe winters of Vermont in the open ground, without the slightest protection. It is a perpetual bloomer Summer and Winter. The flowers, which are produced in the greatest profusion, are perfectly double and of perfect shape. They are of a deep, rosy red, and delightfully fragrant. 10c. each; 3 for 25c.

Perle des Jardins. Unquestionably the finest yellow Rose for either Summer or Winter flowering. The flowers are very large and double, of perfect form. Color a rich shade of yellow; a healthy, free grower, with beautiful foliage and a great profusion of bloom. Belongs in every collection. 10c. each; 3 for 25c.

ONE EACH OF THE SIX ROSES ON THIS PAGE FOR 65c.

LIST OF FINEST HARDY HYBRID PERPETUAL ROSES.

Margaret Dickson. Undoubtedly the finest White Hybrid Perpetual yet introduced. The flowers are of the purest white, of extra large size, and of immense substance. It is a strong, vigorous grower, with fine, large foliage. Each, 20c.; 3 for 50c.

New Rose, Mrs. R. G. Sherman Crawford. This lovely new hybrid is one of the few large-flowering Roses that blooms constantly and are perfectly hardy. Color, deep rosy-pink, the outer petals tinted with pale flesh in quite a new and unique shade; white at base of petals. The flowers are large, full, and very fragrant, of perfect imbricated form, and freely produced, the plant blooming continually, from early summer to late autumn. Each, 20c.; 3 for 50c.

Clio (new). Flesh-color. This is one of the finest roses we have yet seen, and we predict for it, as soon as known, the greatest popularity. It has the most delicate texture and coloring imaginable, a beautiful globular form, and in size is something truly striking. In our nurseries the past season we saw on two-year old plants great globular flowers that were at least six inches in diameter, and truly magnificent in appearance. The plant is a very vigorous grower, perfectly hardy, and the flowers are very freely produced throughout the season. Each, 20c.; 3 for 50c.

One each of these three new roses, 50 cents.

The Grand Rose, American Beauty. The largest, sweetest, and best of all Hardy Roses. It is a genuine, hardy, ever-blooming Rose. For immensity in size, rich color, exquisite form, and delicious fragrance, it stands without an equal. It is a quick and hardy grower and a continuous bloomer; valuable both for house and garden culture. Color is a rich crimson; its fragrance is wonderfully sweet. Each 20c.; 3 for 50c.

Anne de Diesbach. Brilliant shell-pink; very large and showy, sweetly scented; very double, and of fine form; of strong, growing, vigorous habit. Each, 15c.; 2 for 25c.

Baron de Bonstettin. Rich, dark red, passing to a deep velvety maroon, sometimes almost purple; large, sweetly scented, very double and beautiful. Each, 15c.; 2 for 25c.

CAPRICE.

Caprice. A striped rose, the ground color being a clear satiny pink, distinctly striped and dashed with white and bright carmine. The flowers are large, slightly cup-shaped, but full and deep. The buds are especially handsome, being of fine shape and showing the stripe and markings to great advantage. Each, 15c.; 2 for 25c.

General Jacqueminot. Rich, velvety crimson, changing to scarlet crimson. A magnificent rose; equally beautiful in the bud state or open. This is the best known of all Hardy Perpetuals, and is without a rival in fragrance and richness of color. It is as easy of cultivation as many of the more common varieties, and perfectly hardy. Each, 15c.; 2 for 25c.

John Hopper. One of the most reliable and satisfactory H. P. Roses. Flowers large, regular and full; color brilliant rose, changing to bright, glowing pink, shaded with rich crimson; very sweet, and a remarkably profuse bloomer. Each, 15c.; 2 for 25c.

Mme. Gabriel Luizet. One of the most beautiful of all Roses. It is extra large, with broad, shell-like petals, elegantly formed, very double and full, delightfully suffused with lavender and pearl. Each, 15c.; 2 for 25c.

Paul Neyron. Deep, shining pink. Flowers often five inches in diameter, and the buds always develop fine, perfect Roses. It is a good, strong grower; almost thornless stems, which often attain 6 to 8 feet in one season. Each, 15c.; 2 for 25c.

Prince Camille de Rohan. Very dark, rich, velvety crimson, passing to intense maroon, shaded black; large, full flowers, appearing at a distance as if really black. One of the darkest roses; very handsome. Each, 15c.; 2 for 25c.

NEW TWICE-BEARING FRENCH STRAWBERRY, ST. JOSEPH.

New Twice-Bearing French Strawberry, St. Joseph.

This new berry will create a sensation among growers as soon as its merits are known. It is of excellent flavor, dark red in color, large size and firm, but its leading characteristic is its strong tendency to bear two full crops in a season. Indeed, its tendency is to keep throwing up flower stems from May to Autumn, but for commercial purposes it is better after taking off the Spring crop to pinch off the blossoms and you will get a heavy Fall crop. *The plant is vigorous in every direction.* Its dark green, thick, tough leaves resist disease. It makes runners freely and is a great *berry maker*. This is an unusual combination. 10c. each; 3 for 25c.; 7 for 50c.

Marshall. Large, the first of the extra large varieties to ripen, and although of great size, the fruit is rarely ever misshapen. The color is a rich, glossy crimson. 35c. doz.; 50 for 60c.

Varieties marked (P) have imperfect flowers; they will not produce well unless every fourth or fifth row or plant is a perfect flowering variety. Thus planted the (P) sorts are the most productive.

A Strawberry Collection.—100 fine, healthy plants, in four good sorts, our choice, prepaid, \$1.00.

Nic Ohmer. The plant is very large and stocky. It is probably not surpassed in healthy, vigorous growth and great productiveness by any variety. It has a perfect blossom. The fruit is of the very largest size. It is dark glossy red, firm, and of excellent flavor. 35c. doz.; 50 for 60c.

Reba. The size and immense productiveness of this berry will particularly please, and the color and quality is all that could be desired. Plant vigorous, hardy, and long-lived. One of the most productive varieties that we have ever fruited; fruit very large, bright red, good quality, firm. Midseason. 50c. doz.; 50 for \$1.00.

Success. Perfect blossom. Plant a strong grower and free from rust; very productive. Berries nearly as large as Bubach and as firm as Michels; heart-shaped, bright crimson color; ripening evenly all over. Season of ripening early. 35c. doz.; 50 for 60c.

Nettie Black (P). A seedling of Bubach and Yale was crossed with Sharpless. The best of these seedlings were again crossed with Gandy, and among them was found the Nettie, the largest strawberry that we have ever fruited. It combines with this valuable quality the productiveness of Bubach and the vigor of plant so prominent in Sharpless.

Plant and foliage exceptionally strong, vigorous, and healthy; enormously productive. Berries very large, bright red, exquisite quality. Ripens very late. 50c. doz.; 50 for \$1.00.

STRAWBERRY NETTIE BLACK.

Cumberland

(TRADE-MARK)

THE "BUSINESS BLACK-CAP," Largest Black Raspberry known.

CUMBERLAND RASPBERRY COMPARED WITH WILSON BLACKBERRY.

This new Raspberry is placed upon the market after having been thoroughly tried for a long period of years. It originated some nine years ago with Mr. David Miller, a life-long horticulturist and fruit grower, located near Harrisburg, Pa., who has during all this time carefully and thoroughly tested it under all conditions. It is now offered with the full assurance that it is **the most profitable and desirable market variety yet known**, because of its **immense size, firmness and great productiveness**, well entitling it to the above designation of "**the Business Black-Cap.**"

Compared with the well-known Gregg, the Cumberland is hardier, healthier and equally productive. The berries are larger, as fine flavor, earlier and free from the objectionable bloom. Can any higher praise be given?

Price 10 cts. each; 3 for 25 cts., post-paid.

The New **WHITE** Blackberry

"Iceberg."

The Paradox of the Fruit World.

A Scientifically Bred, Pedigreed Berry.

UNSURPASSED IN FLAVOR, SIZE AND
PRODUCTIVENESS.

RAISED BY

LUTHER BURBANK,

The "Wizard of Horticulture."

Price 15 cts. each; 2 for 25 cts., by mail.

Descriptive circulars of each of these wonderful
berries sent upon application.

ICEBERG BLACKBERRY.

HIBISCUS PEACHBLOW.

it, either in pots or plants out in the garden. It is a good winter bloomer in the greenhouse or sunny window. First size; Strong, well-rooted plants, each, **15c.**; 2 for **25c.**, prepaid.

American Wonder Lemon. Fruit bearing house plants of real value are so rare that any new one commands attention. In this wonderful Lemon we have the rich glossy leaves like the dwarf Orange, which are so easily kept clean, and with them these giant fruits. Its blossoms are waxy white, like a Tuberose and as fragrant as Orange blossoms. This is not only a show fruit but equal in every way to ordinary lemons while ten times as large. The Wonder Lemon must take a place in every good collection of house plants. **20c.** each; 3 for **50c.**

The Otaheite Dwarf Orange. Dwarf free-flowering variety, which is suitable for pot culture, and which with any one proves one of the most desirable pot plants it is possible to possess. While it will grow three or four feet high and branch freely, it is not an uncommon thing to see little cutting plants five or six inches high full of bloom, and even bearing one or two medium-sized oranges. The fruit at their best are not more than half the size of an ordinary orange, but are very bright and beautiful in color, delicious in quality; but it is for its flowers more than its fruit which commands it to general cultivation. When it blooms it is so full that it seems to be all flowers. The pure waxy-white blossoms emit a delicate yet powerful fragrance, which is surpassed by no other flower. Price, **15c.**; 2 for **25c.** Larger plants, **20c.** each.

OTAHEITE ORANGE.

The New Kumquat, or Christmas Orange. This is likely to create a greater sensation than the now well-known Otaheite Orange. The plants imported by us from Japan a few years ago have been much admired by connoisseurs. They are always eagerly snapped up at fancy prices when in fruit. What could be more fascinating than one of these little plants, a couple of feet high, decorated with fancy ribbons and covered with dainty little oranges, as a centerpiece for a dinner table? And when it is known that the fruit is delicious to eat, one's delight is still greater. Easy to bloom and fruit. Nice grafted plants, **30c.** each; 2 for **50c.**

CHRISTMAS ORANGE.

AMERICAN WONDER LEMON.

New Plum-"Apple."

Peach Orange Free.

Orange Free. The finest peach for family garden. Round, like an apple; flesh, yellow,

with yellow skin mottled with red. The sweetest of all peaches, the best flavor possible.

		Ever-Bearing Peach.		EACH.	DOZ.	100.
PEACHES.	{ Large Trees by Express,	-	-	20c.,	\$2.00,	\$18.00
	{ Large Trees by Mail,	-	-	30c.,	\$2.50	
	{ June Bud Trees by Mail,	-	-	10c.,	\$1.00	

Everbearing. ✱ It is one of the most remarkable peaches, as it combines many desirable qualities which make it of great value for family use. The trees contain ripe and green peaches during this entire season, and as they bloom during so long a period there is sure to be a crop on them every year. Fruit is a creamy white, mottled and striped. Flesh, white, with red veins near the skin. Very juicy and of excellent flavor.

Japan Dwarf Blood. ✱ This is the earliest of all peaches. It is a dwarf-growing and very stocky variety from Japan, bearing when 3 or 4 feet high; a little tree, one year planted, matured 24 fine specimens. Free from the danger of damage by late spring frosts. Fruit, large. Color is a beautiful crimson and yellow, heavily overlaid with red on sunny side, really having the appearance of blood red. The flesh is rich, juicy and most excellent quality.

Triumph. ✱ Fruit of large size, yellow, nearly covered with red, showing dark crimson on the sunny side. Flesh, bright yellow.

Elberta. ✱ Large, yellow, with red cheek, juicy, and high flavor; flesh yellow.

		Large, yellow, with red cheek, juicy, and high flavor; flesh yellow.		EACH.	DOZ.	100.
PLUMS.	{ Large Trees by Express,	-	-	25c.,	\$2.50,	\$20
	{ Large Trees by Mail,	-	-	30c.,	3.00	
	{ June Buds by Mail,	-	-	10c.,	1.00	

Apple. ✱ Named on account of its long-keeping qualities and strong resemblance to an apple. Rich and very high flavored, deep reddish purple. Ripens after Burbank. Very desirable.

Burbank. ✱ Ripens after Abundance. Hardy, vigorous grower, unequalled in productiveness. Bears young. Fruit, large, excellent quality; cherry red, with lilac bloom. Aug.

October Purple. ✱ The fruit is round in form, color a reddish purple; flesh yellow, and quality superb. Ripens the middle to the last of September. Its large, even size, and beautiful color, late season in ripening, long keeping and superb quality make it a very desirable variety.

Red June. ✱ By all odds the best Japanese plum, ripening before Abundance. Productive; vermilion red with handsome bloom; pleasant quality.

Holt's Mammoth Sage.

The illustration shows a leaf of average size. The plants are very strong growing, the first season attaining one foot in height, and spreading so that a single plant covers

a circular space three feet in diameter. The leaves are borne well above the soil, keeping them clean; they

are very large and of unusual substance, strong in flavor, and of superior quality. It is perfectly hardy, even in New England, and attains still larger growth the second sea-

son. A single plant of Holt's Mammoth Sage will yield more than 10 of the common variety. It never seeds, Price, 10c. each, 3 plants for 25c., 7 for 50c., or 15 plants for \$1, sent safely, postpaid, by mail.

Rhubarb.

Monarch.

The largest, best and most distinct sort in cultivation. The stalks are very broad, thick, succulent and of superior flavor. The Monarch has been awarded first prize for several years at exhibitions of the Massachusetts Horticultural Society. On one occasion the 12 stalks shown weighed 28 pounds, leaves off. The average length of stalk is about 16 inches. Seed, pkt., 10c., ounce, 25c., $\frac{1}{4}$ pound, 75c., pound, \$2.50, by mail.

Rhubarb Roots. Set in spring and they will furnish leaf stalks the following season. We offer the largest and best variety, 10c. each, \$1 per dozen, by mail. By express, dozen, 60c., \$4 per 100.

MONARCH RHUBARB

(PIE PLANT)

Tarragon.

The True Tarragon (*Artemisia dracunculoides*) seldom, if ever, gives fertile seeds, but is appreciated thoroughly by all who know it for the use of its aromatic leaves in seasoning or salads, also for Tarragon Vinegar. The foliage, if cut in autumn, can be kept in a dry state the same as other herbs. In the northern states give some protection during the winter. At the low prices named the True Tarragon should now find a place in every good garden, as it is very valuable for its own delightful qualities, and no other herb can rightly take its place.

Price of plants, 15c. each, 2 for 25c., 5 for 50c., 12 for \$1, postpaid.

Tarragon.

Asparagus Plants.

These prices do not include postage. If to go by mail, add 25c. per hundred for the 1 year old plants, and 50c. per 100 for the 2 year old plants. We furnish 25 of a kind at the 100 rate, except where noted.

Columbian Mammoth White. One year old roots, dozen, 15c., 100, 75c., 500, \$3, 1,000, \$5.50; 2 year old plants, 100, \$1, per 1,000, \$6.50.

Palmetto Asparagus. Very large, and very early sort. Prices, same as Columbian White.

Golden Cluster Hop Vine-Roots.

Every one should have their own Hop Vine, a beautiful and useful plant. A large productive sort, growing in clusters and easily gathered; the finest variety. Price, by mail, postpaid, 10c. each, 75c. per dozen.
